

GERMGUARDIAN FLT4825 REPLACEMENT FILTER B INSTALLATION INSTRUCTIONS

The **GermGuardian FLT4825** is a genuine True HEPA replacement filter designed to improve indoor air quality by capturing 99.97% of airborne particles as small as 0.3 microns. It combines a HEPA filter with an activated carbon pre-filter to target dust, allergens, pet dander, mold spores, and household odors.

This replacement filter is compatible with several GermGuardian air purifier models and is ideal for users who need both high-performance filtration and easy maintenance.

STEP-BY-STEP INSTALLATION GUIDE:

1 TURN OFF & UNPLUG THE UNIT:

- Ensure the air purifier is powered off and unplugged to avoid any electrical hazards.

2 OPEN THE FILTER COMPARTMENT:

- Locate the back panel of your GermGuardian unit and press the release tab to open.

3 REMOVE THE OLD FILTER:

- Slide out the used filter and discard it. Take note of how the filter was positioned.

4 CLEAN THE INTERIOR (OPTIONAL):

- Wipe down any dust or debris from the filter housing before installing the new filter.

5 INSERT THE NEW FLT4825 FILTER:

- Place the new filter into the unit, ensuring it aligns with the airflow direction arrows.

6 REATTACH THE BACK PANEL:

- Secure the cover by pressing it back into place until it clicks.

7 RESET THE FILTER INDICATOR:

- If your model has a filter change indicator, reset it by holding the appropriate button as per the user manual.

USAGE TIPS

Check Every 3 Months: Inspect the filter regularly for dust buildup.

Replace Every 6-8 Months: For best results, replace based on air quality and usage.

Avoid Aftermarket Replacements: Stick to genuine FLT4825 filters to maintain performance and warranty.
