

# CUT CARBON INSTALLATION INSTRUCTIONS

**Odor Reducing Pre-Filters** are designed to keep your indoor air fresh and free of unpleasant odors. Perfectly compatible with all HA/HPA090, 100, 200, 300, 8350B, 3000, and 5000 Series air purifiers, these filters are easy to use and maintain, providing optimal performance when replaced every 3 months.

## HOW TO INSTALL YOUR PRE-FILTER:

**Before you begin**, turn off and unplug your air purifier to ensure safe installation.

### STEP-BY-STEP INSTRUCTIONS:

**1**

#### REMOVE THE FRONT GRILLE:

- For HA/HPA090, 100, 200, 300, and 8350B Series: Press the two release symbols and lift the grille.
- For HPA3000 and 5000 Series: Grasp the sides of the grille and pull it forward.

**2**

#### PREPARE THE PRE-FILTER:

- Take the pre-filter out of the protective plastic bag.
- **DO NOT** immerse the pre-filter in water.

**3**

#### POSITION THE PRE-FILTER:

- Place the pre-filter over the HEPA or Enhanced Odor & VOC filters.
- Securely tuck the edges of the pre-filter into the tabs around the housing.

**4**

#### REATTACH THE GRILLE:

- Align the grille's bottom tabs with the slots on the unit, then gently push the top into place.
- For HA/HPA090, 100, 200, 300, and 8350B Series: Press on the release symbols to lock the grille.

**5**

#### RESET THE FILTER INDICATOR LIGHT:

- For HA/HPA090, 100, 200, 300, and 8350B Series: With the unit powered on, press and hold the "Check Pre-Filter" button for 2 seconds until the light turns off.
- For HPA3000 and 5000 Series: With the unit powered off, press the Filter Reset button twice quickly. The light will blink twice, then turn off.

## KEEP YOUR HOME'S AIR FRESH, CLEAN AND ODOR-FREE!

With Filterbuy Odor Reducing Pre-Filters, maintaining a fresh and healthy home environment has never been easier. **Follow these simple steps, and let your air purifier do the rest!**
