

Mini Pleat Air Filters

MERV 15 Mini Pleat 4" w/ Header

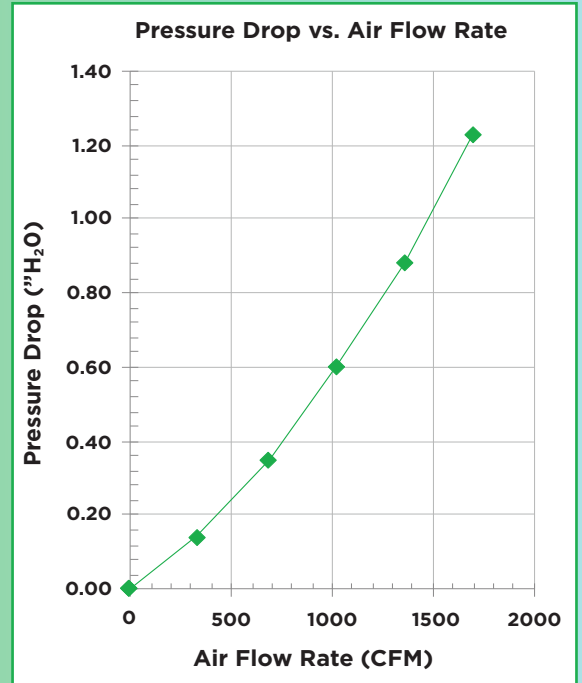

Convenience Where You Need It Most

Filterbuy is proud to manufacture mini pleat filters in the United States. Our mini pleats are constructed with durability and longevity in mind. Filterbuy mini pleat filters are designed with tighter pleats, which allows for a higher packing density of filter media. The compact design results in a filter that can handle larger volumes of air while maintaining a high level of particle removal. With an increased surface area more particles are trapped and allows for lower air flow resistance, resulting in greater energy cost savings.

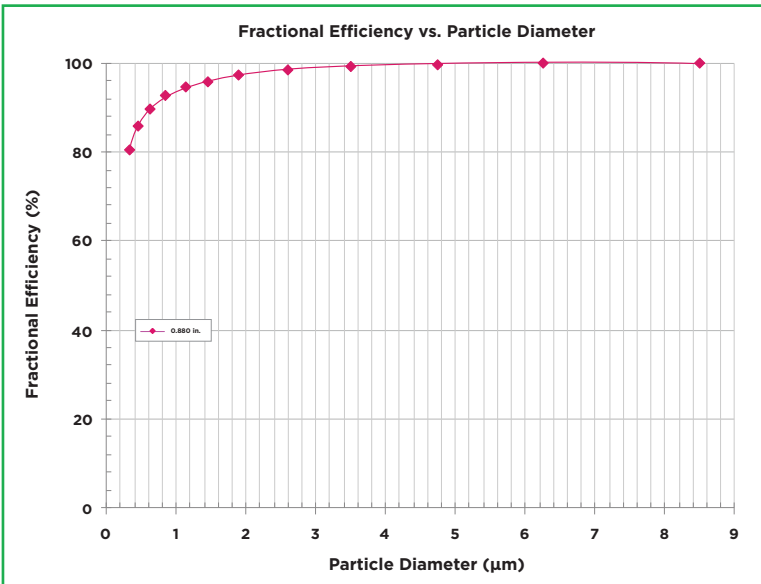

Top Reasons to Choose Filterbuy Business

- Wholesale pricing from the factory
