

MERV 10 Odor Eliminator 1"

American-Made Filters Guaranteed To Fit

Filter unpleasant odors and VOCs while trapping airborne pollutants at the same time with our odor-eliminating charcoal/carbon filters. Our Odor Eliminator charcoal filters are a must for businesses with pets, daily cooking, strong cleaning products, scented candles, or mysterious lingering smells. Filterbuy charcoal filters are perfect if you love a clean-smelling building or want the most reviewed carbon filter on the market!

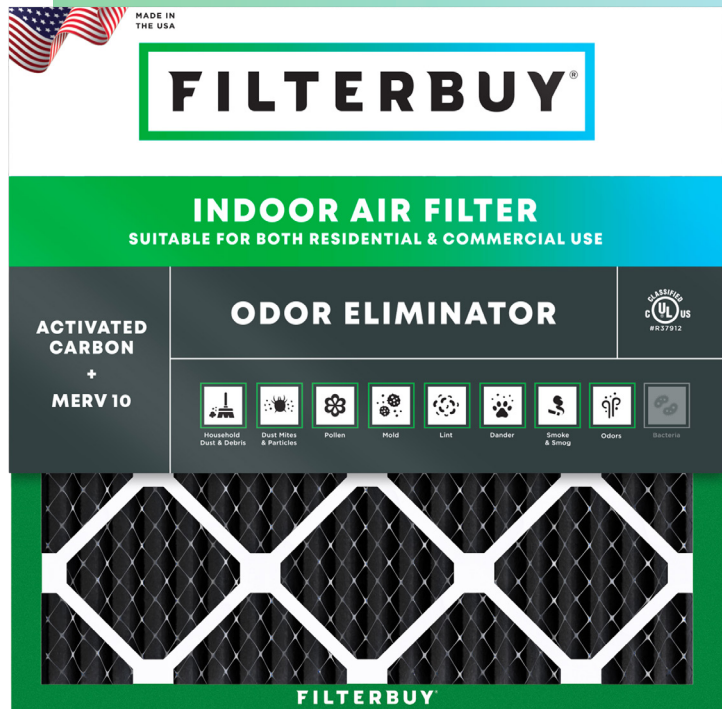

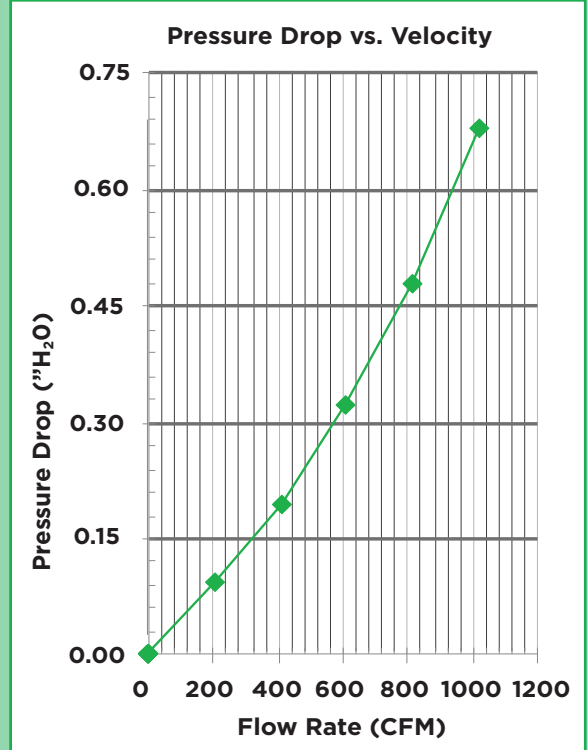

We use electrostatically charged media in our pleated charcoal filters to trap 90% of airborne particles in your indoor air. These particles can grow and produce smells, including mold, mildew, pet dander, and cooking odors.

Also known as carbon filters, these filters offer the same level of particulate filtration as our popular MERV 8 filters (comparable to MPR 600 & FPR 5 models) with the added benefit of odor removal. Pollutants in your indoor air can produce lingering smells, especially if you aren't using high-quality air filters or forget to change your filter regularly.

Odor Eliminator What Does It Offer?

- Odor Removal
- Eradicates Harmful Gases & VOCs
- Captures 90% of Airborne Particles
- Clears Smoke & Chemical Fumes
- Improves Indoor Air Quality
- Neutralizes Unpleasant Smells
- Does Not Release Harmful Byproducts
- Also Available in 2" & 4"

Filterbuy Business sells wholesale direct from our seven strategically located factory-distribution centers.
MADE IN USA

Why Choose a Charcoal Air Filter?

Eliminates Odors: These filters are great at trapping and neutralizing unpleasant smells from things like cooking, pets, smoke, and even cleaning products.

Removes Harmful Gases & VOCs: VOCs, or volatile organic compounds, are emitted from many household products like paint, air fresheners, and certain furniture. Carbon filters effectively trap these gaseous pollutants, creating a healthier environment

Clears Smoke & Chemical Fumes: If you live with smokers or have occasional exposure to paint fumes, a carbon air filter can help remove those airborne particles, making breathing easier.

Improves Indoor Air Quality: By removing these contaminants, carbon filters contribute to a generally cleaner and healthier indoor environment, especially for people with allergies or respiratory problems.

Safe To Use: Unlike some air filters, carbon filters don't release any harmful byproducts back into the air during the filtration process.

Don't just take our word for it:

★ ★ ★ ★ ★

"This is the 2nd time I've ordered the odor eliminator filters, they work perfectly especially with cooking odors. I also like the fact that I can buy in bulk to keep costs down. Good quality product."

★ ★ ★ ★ ★

"The price, delivery, and quality were all excellent. I'm happy to no longer buy from big box stores! The recurring delivery will help me keep my A/C clean."

★ ★ ★ ★ ★

"They are fast and efficient, and the filters they provide are top quality. Their customer service is easy to reach. It just does not get any better."
