

FILTERBUY®

AUTO CABIN INSTALLATION INSTRUCTIONS

HOW TO INSTALL YOUR CABIN AIR FILTER:

1

POWER DOWN & ACCESS

- Turn off your vehicle.
- Locate the cabin air filter compartment, usually behind the glove box.
- Open the panel and slide out the old filter.

2

PREP & INSERT

- Clean any dust or debris from the housing.
- Then, slide the new Filterbuy cabin air filter in, make sure the airflow arrow points in the right direction and the panel snaps securely shut.

3

DISPOSE, REALIGN & BREATHE EASY

- Toss the old filter.
- Close the glove box.
- Start your vehicle.
- Rest easy knowing you're breathing clean, healthy air on every drive.

NOTE: Filter locations vary by make and model. If you're having trouble finding your cabin air filter compartment, refer to your vehicle's owner manual for exact placement instructions.
